Examples

src="my-script.js"

type="text/javascript"
language="javascript"

Utf-8

<script src="1.js">

</script>

<script src="2.js" *defer*>

</script>

<script src="3.js" *async*>

</script>

Syntax

Statements vs Expressions

action

value

;

{ }

(

,

)

semicolon

curly brackets

comma operator

brackets

Statements

side effects

var, for, if, switch, throw, return, try...

Expressions

returns value

2 + 3, 'webdev club'

Statements

statement

var a = 'webdev';

expr

Statements

statement

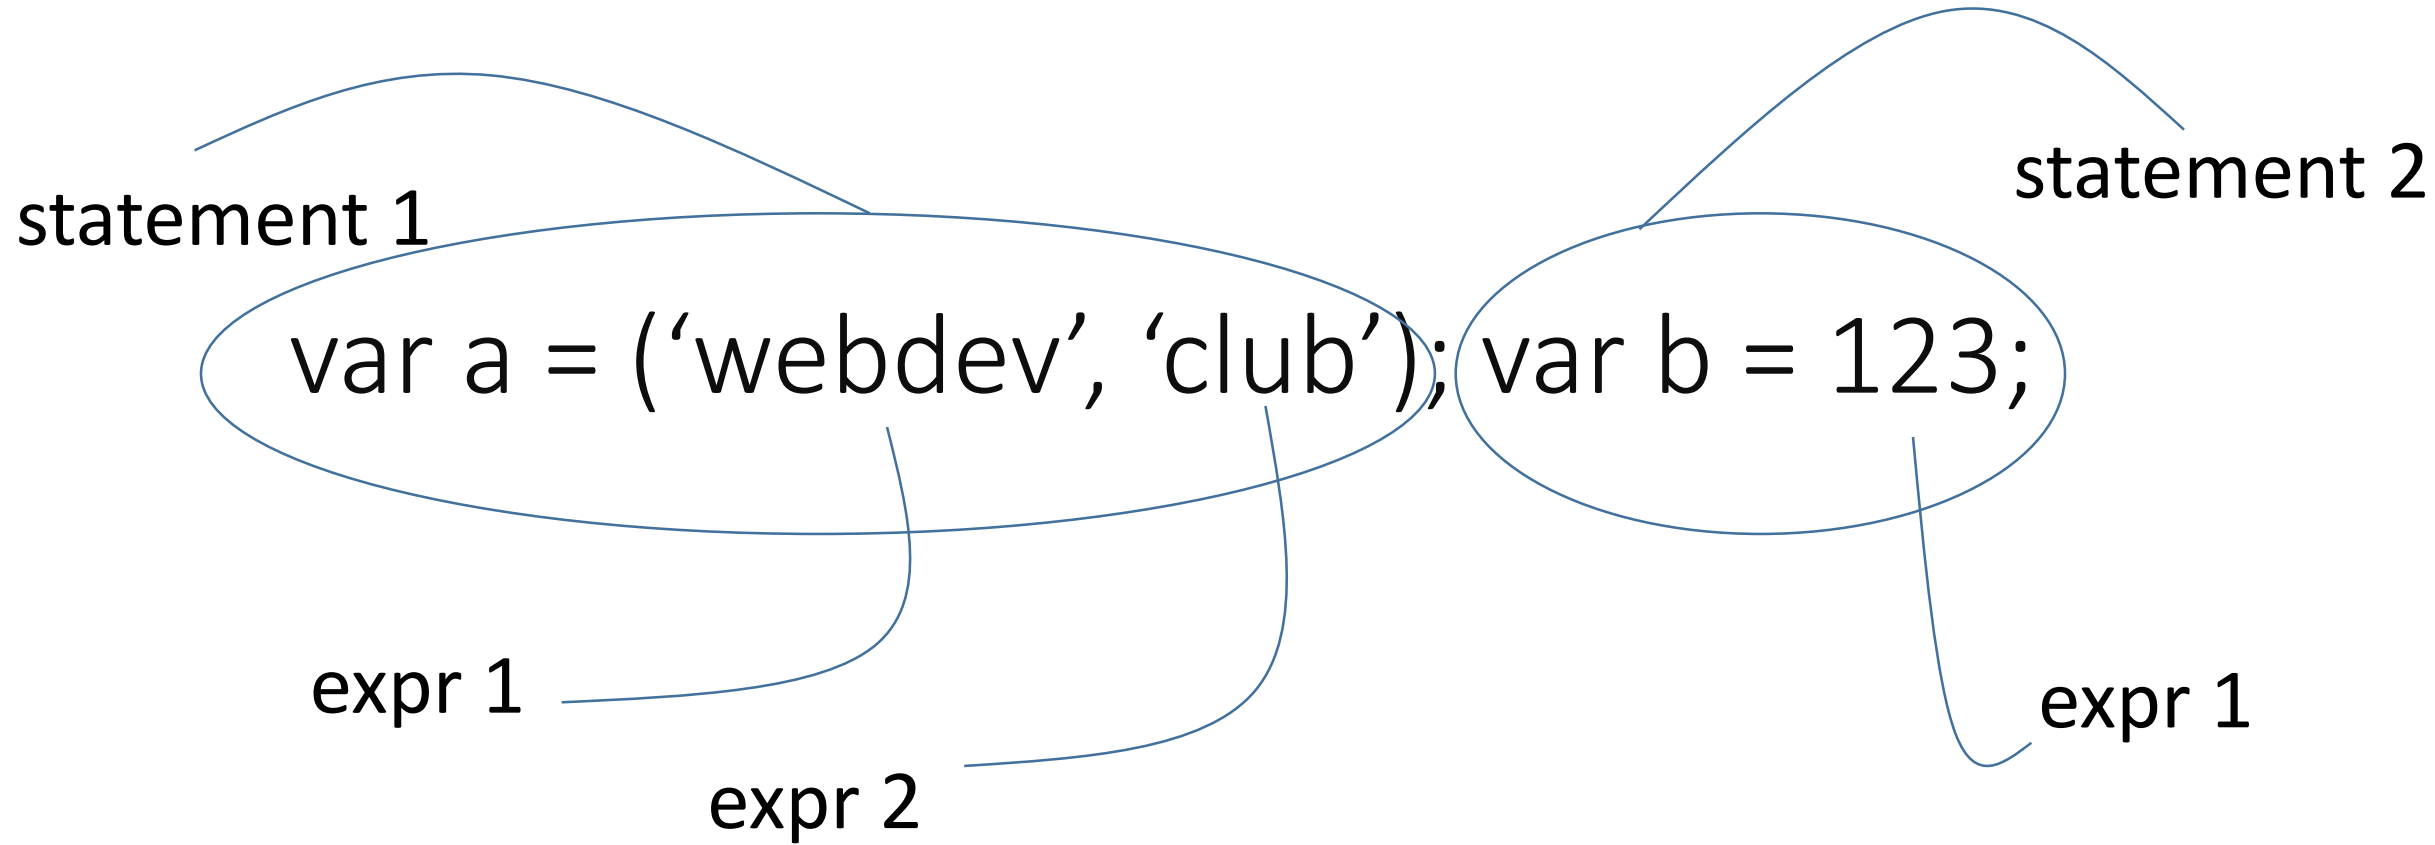

var a = ('webdev', 'club');

The diagram shows a blue oval enclosing the entire statement 'var a = ('webdev', 'club');'. A line from the 'statement' label points to this oval. Inside the oval, two lines point to the expressions: 'webdev' is labeled 'expr 1' and 'club' is labeled 'expr 2'.

expr 2

expr 1

Statements

Comments

// comment

/*

A lot
Of
Comments

*/

Variables

variable statement

```
var rok = 2015;  
var dalsiRok = rok + 1;  
var rok;  
var tentoRok = rok = 2016;  
var minulyRok = 2014, dalsiRok = 2016;
```

Variables

variable statement

```
var rok = 2015;  
...  
rok = 808;
```

Variables

Utf-8

\$ _

~~1semester~~

no whitespace

case sensitive

\u0072\u006F\u0062

Variables

let
const

Variables

hoisting
scope

`'use strict';`

Output

environment console
console.log()
alert()

Output

```
console.log(1 + 2);
```

```
console.log('webdev');
```

```
var a = 123; console.log(a);
```

Output

```
var clog = console.log.bind(console);  
clog(123 + 321);
```

Data Types

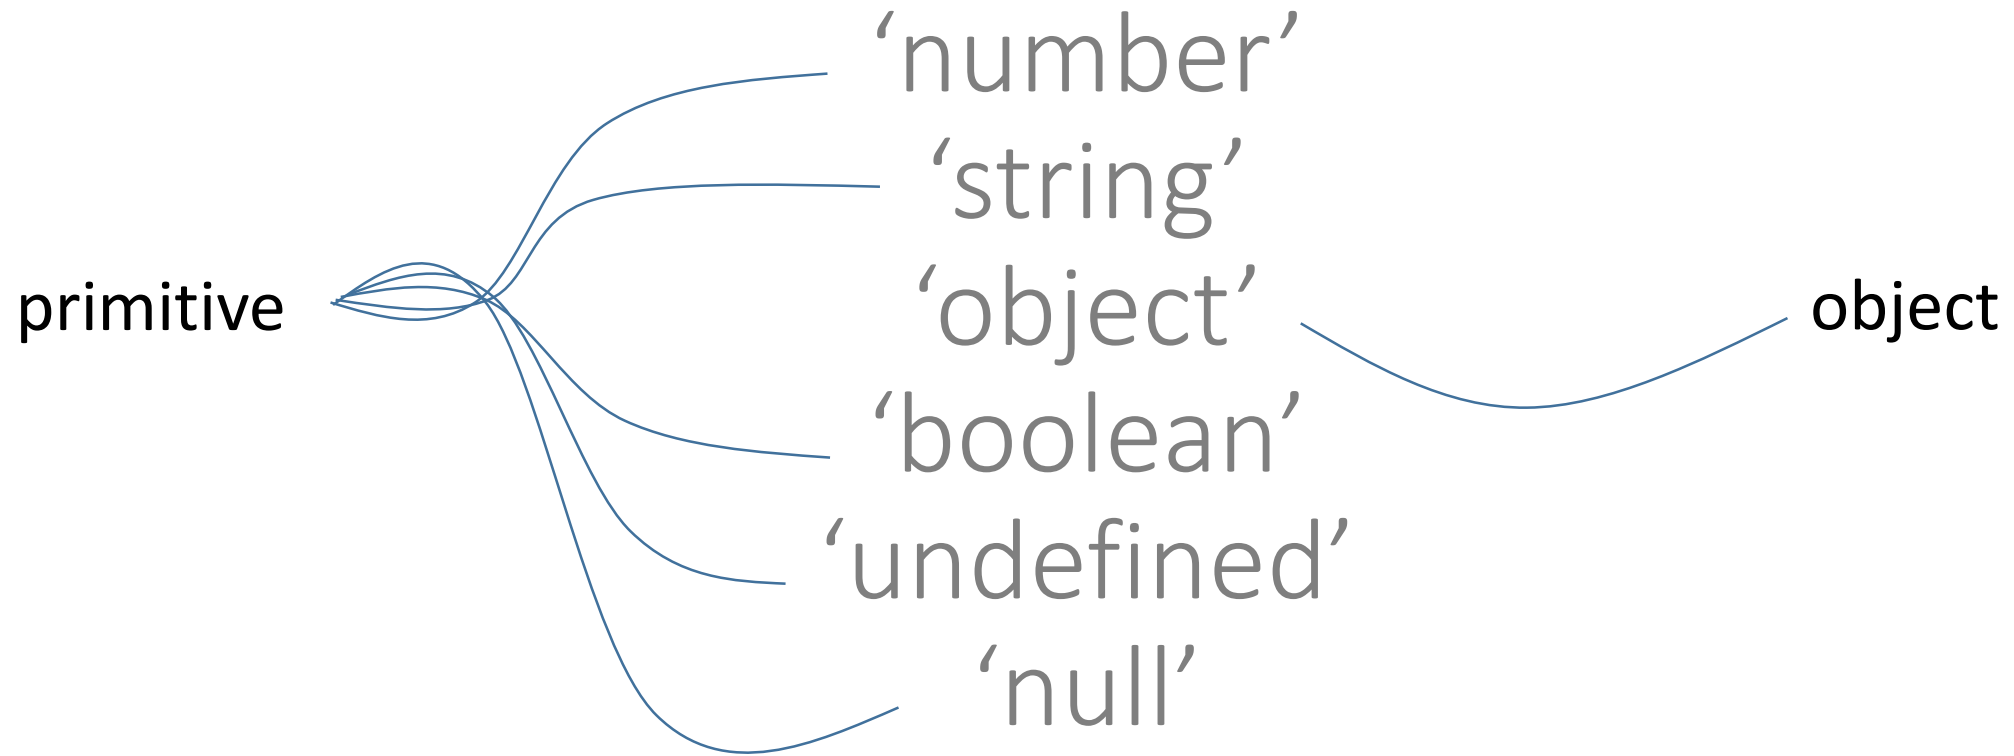

typeof

Data Types

```
console.log(typeof 123);
```

```
var wd = 'webdev'; console.log(typeof wd);
```

Data Types

Data Types

'symbol'
'function'

arrays

Data Types

Number

String

Object

Boolean

Function

Array

Symbol

Data Types

Casting
Auto-boxing

123 vs '123'
0 vs ''

Data Types

```
/* 2016 is number */
```

```
var rok = String(2016);  
var dalsiRok = new String(2017);
```

```
/* rok is string ('2016'), dalsi rok is object */
```

Data Types

I don't like this :\

WAT

www.destroyallsoftware.com/talks/wat

Data Types - *undefined*

default variable value
default property value
typeof returns 'undefined'
void 42
{ }.u
undefined == null
function args

Data Types - *null*

empty value
undefined == null
semantic diff
object
GC

// end
